

Recovery

Overview of the American Recovery and Reinvestment Act of 2009 (Recovery Act)

The American Recovery and Reinvestment Act of 2009 (Recovery Act) was signed into law by President Obama on February 17th, 2009. The Act included measures to modernize our nation's infrastructure.

Implementing the American Recovery and Reinvestment Act of 2009 (Recovery Act)

The GSA OIG implemented the provisions of the Recovery Act to the full extent of its capabilities. Additional auditors, investigators, and subject experts were brought on board to review activities arising from the funds assigned to GSA. The GSA OIG has provided comprehensive oversight of the stimulus funds, including streamlined, up-front reviews, while maintaining its core activities.

Core oversight activities included internal audits that evaluate GSA functions and programs for economy, efficiency, and effectiveness; contract audits of proposals for multiple award schedule contracts as well as high value contract modifications and claims under construction contracts; and investigations of criminal activities that impact GSA programs.

Training

DOJ - GSA OIG Joint Recovery Act Fraud Awareness Briefing

The GSA Office of Inspector General and the Department of Justice teamed up to provide GSA Associates a fraud awareness briefing. DOJ's presentation "The Recovery Act: Understanding, Detecting, and Reporting Antitrust Violations" focused on the Sherman Act and the M.A.P.S. (Market, Application, Patterns, and Suspicious Behavior) tool for detecting collusion. The GSA Office of Inspector General's presentation, "Fraud, Waste and Abuse in the Recovery Act" focuses on how to detect and report various contract fraud indicators such as product substitution, bribery, false claims, etc.

PowerPoint presentations can be accessed on the links below.

Using Advanced Computer Technology to Identify and Investigate Recovery Act Fraud

Course Description: Fight Recovery Act fraud with the latest in forensic auditing techniques. Examine methods that have proven to be of value in recognizing patterns and making predictions for fraud detection in 15 Government databases. This training will help you develop a competitive edge in your agency's fight against fraud by developing and using computer technology to search for false vendors, patterns of unusual activity, suspicious credit card use, etc. Training will focus on the techniques to identify potential fraud in Government contracting and construction. This training will include hands-on case studies to identify fraud indicators within sample databases. Attendees are expected to bring laptops. Training software and materials will be provided.

Presenter: Dr.曹安 C. Albrecht, Assistant Professor and Rollins Fellow at the Marriott School of Management at Brigham Young University. Dr. Albrecht researches computer-related fraud detection, collaborative computing, peer to peer architecture and network programming.

Target Audience: Government Auditors and Investigators overseeing Recovery Act expenditures.

Dates: November 17 and 18, 2009.
